Vertical Form Fill And Seal Machines

GIC has been designing, installing, and servicing vertical form fill and seal packaging machines for four decades. UK-made to the highest standards, GIC's machines play an essential role across a wide range of industries.

GIC machines are designed and built in Gainsborough to exacting standards. We are a gold-level partner in the Rockwell Automation PartnerNetwork™ programme, and all our component suppliers are hand-picked for quality and reliability.

Irrespective of whether you are packing fresh produce, proteins, bullion, confectionery, salad or aggregates, we can design a machine customised to your requirements. We back up our engineering excellence with operator training and comprehensive service and maintenance plans to ensure hassle-free ownership.

Our vertical form fill and seal machines offer the optimum combination of effectiveness, reliability and low cost of ownership backed by first-class technical and servicing support.

Turnkey Solutions

Over the last 40 years, as well as designing, manufacturing and installing Vertical Form Fill and Seal packaging machines, we have also developed extensive experience in delivering turnkey projects.

From design and specification to sourcing, project management, installation and commissioning, our experienced engineering team has the skills to deliver complete solutions.

Our portfolio of completed projects includes bullion plants and food packing lines comprising multi-head weighers, check weighers, baggers, metal detectors, coin counting systems and volumetric fillers connected by conveyors and gantries.

We can offer the facility to assemble bespoke packaging lines at our factory in Gainsborough, allowing extensive testing prior to delivery, giving our clients complete peace of mind. Once operational, we offer exceptional ongoing service and maintenance support to ensure the smooth operation of our turnkey solutions.

Some Of Our Turnkey Project Experience

Free Site Appraisals

Irrespective of whether or not you currently rely on GIC vertical form fill and seal packaging machinery to keep your production line flowing efficiently, we offer free site appraisals.

Our experienced engineers will visit your facility and provide an accurate overview of the current condition of your packaging machinery, service and maintenance requirements, available software and hardware upgrades and opportunities to improve operating efficiency.

To request a free site appraisal, email info@gic.uk.net or call 01427 611885.
